WHO IS INTASPORDIA<sup>SM</sup>?

INTASPORDIA<sup>SM</sup> is an acronym for  
"International Academy of Sports, Media and  
Arts."

We are the first and only Academy of Sports,  
Media & Technology and Arts & Design in  
Africa. We are a Co-Ed, Day/Boarding Primary  
School situated in Mang'u, 2.5 kms along  
Bob Harries Road, Exit-16, off Thika  
Super Highway. We follow the National (CBC)  
curriculum and currently doing Admissions  
from Playgroup to Junior High School.

DO YOU EVER FEEL THAT YOUR CHILD IS CAPABLE OF  
MORE THAN HIS/HER CURRENT SCHOOL OFFERS?

If yes, your child can only discover their  
full potential and capabilities through  
exploration and age disaggregated play.  
Therefore at INTASPORDIA<sup>SM</sup>, we have created  
a Campus for exploration, first through PLAY &  
TECHNOLOGY and, second through three special  
fit-for-purpose Competency Based Categories  
(CBC) schools: School of Sports, School of  
Media & Technology and School of Arts & Design.

WHAT'S THE DIFFERENCE BETWEEN  
INTASPORDIA<sup>SM</sup> AND OTHER PRIVATE  
ACADEMIES?

Two major aspects:

Our unique offering in  
Competency Based Categories of  
Sports, Media & Technology and  
Arts & Design. These are offered in our  
three special schools that form the  
Academy - The School of Sports, School of  
Media & Technology and School of  
Arts & Design. Your child will commence  
their 10,000 hours of practice toward mastery  
of their chosen skill.

Our unique instructional ethos is based on  
modernization and exploration. These are animated  
by two pillars TECHNOLOGY and PLAY. Our Campus  
at Mang'u is designed to facilitate age disaggregated  
spontaneous, structured and instructional play.  
Additionally we have integrated Ed-Tech where  
teaching and learning are fully digitized.

To learn more about these two major differences between us  
and the average Academy, go to:

[www.intaspordia.com/prospectus](http://www.intaspordia.com/prospectus)

In today's world, we will not ask you if your child can use a smartphone/tablet or laptop. The answer is obvious. But we will ask you if your child can carry these gadgets to their school for learning.

If your answer is NO then know:

Your child's school is training your child in an analogue/obsolete way for an analogue/obsolete world.

While today you use these gadgets for everything from work, communication, banking, money transfer, government services, shopping, business, attending meetings, learning and seminars, church and fellowship, medical and health services etc, your child's analogue school makes your child believe that these gadgets are only good for playing games.

It is not your child who does not know how to use technology for learning, it is their school and their teachers who don't.

Your child is being denied access to inexhaustible modern learning resources and opportunities in cyberspace at your cost by a school stuck in yesterday.

The biggest barrier to your child learning in the modern way for his modern world is not him or herself, it is his/her current school and teachers.

While you invest heavily in your child's schooling, your child is being held back by limitations imposed by the school not by you or by his/her abilities. If you no longer drive a manual car, call from a booth, get mail from the post office, que in a bank to withdraw cash, use a biro to rewind a cassette, climb to the roof to adjust your analogue aerial, light a stove to heat food or travel to the village to take money, what do you hope your child will gain in an analogue school in the 21<sup>st</sup> Century?

At INTASPOORDIA<sup>SM</sup>, we have made Ed-Tech and digital gadgets, (tablets & laptops) compulsory right from Reception Class. We are the first school in Kenya to do this because:

We are training your child for success in their digital future world, not an analogue past world.

We know how to utilize Ed-Tech for learning in the classroom. We don't "Teach ICT". We "Apply ICT" and applicable LMS (Learning Management Systems) as tools for virtual and blended learning in the classroom.

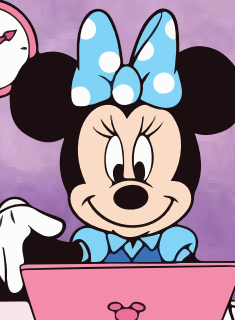

We want your child to benefit from the inexhaustible modern learning resources and opportunities provided by Ed-Tech.

Your child needs to know how to APPLY technology for learning and engaging his world. It is called digital literacy. It is a primary 21<sup>st</sup> Century competence.

If there is a wrong and a right way of using technology, the right place to learn is in the school. Bring your child to us.

We want your child to be exposed to the limitless modern world of technology through digital collaboration and communication across cultures and geographical barriers.

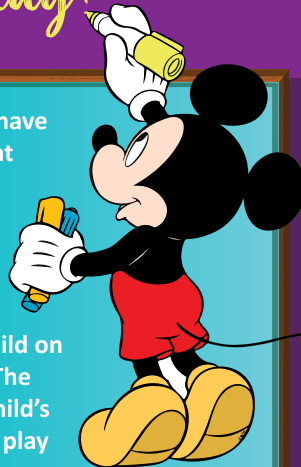

We have removed all physical and technological barriers limiting your child's learning experience. We are not a barrier to your child's modern world and future, we are the gateway.

To learn about Ed-Tech and how we apply it in the classroom,

# Why Play?

Educators and child development experts have identified play as the single most important activity in a child's, cognitive, emotional, physical, creative, social and sensual development, NOT school. Yet, in the contemporary urban settings and schools, spaces for play have become less and less even non-existent. Most academies are built on "plots", and some in shipping containers. The first casualty of this lack of space is your child's play. Recognizing the foundational role of play in your child's life and the diminishing opportunities for play both at home and in school, we have:

An expansive play oriented Campus resourced for spontaneous, structured and instructional age disaggregated play. Visit our Campus at Mang'u for a tour.

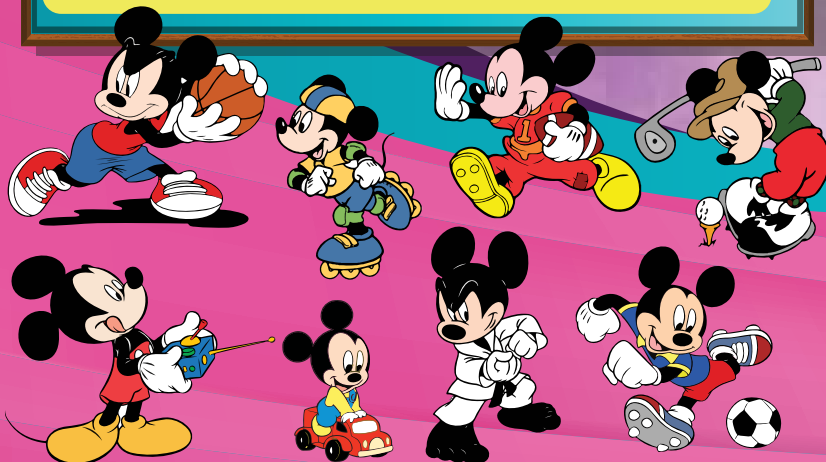

Re-trained our teachers to routinely use play as an instructional methodology in class. No other school does this.

Play to scout for sporting talent.

Institutionalized competitive play and sports in our School of Sports.

If you appreciate the role of play in the foundational development of your child, let's play!

To learn more about the two pillars of **PLAY** and **TECHNOLOGY** and how they work in our pedagogical ecosystem go to:  
[www.intaspordia.com/ourpillars](http://www.intaspordia.com/ourpillars)

CAN MY CHILD GET ADMISSION EVEN IF THEY ARE NOT INTERESTED IN SPORTS, MEDIA AND ARTS?

**Absolutely! We offer the regular National CBC curriculum. Additionally, your child will benefit from our unique instructional practice anchored on modern pedagogical approaches utilizing **PLAY** and **TECHNOLOGY**. We call it "Schoolers Access."**

WHAT IF MY CHILD HAS NOT DISCOVERED THEIR INTERESTS?

**They are more than welcome! We have two paths: One for exploration for those who have not discovered their interests - we call it "Explorer's Delight." The other is the path of mastery for those who have discovered their interests and would like to start their 10,000 hours towards mastery. We call it the "Professional's Plugin."**

For more information on the paths, log into:  
[www.intaspordia.com/prospectus](http://www.intaspordia.com/prospectus)

HOW DO I BOOK AN APPOINTMENT WITH THE SCHOOL OR GET ADMISSION FORMS OR FEES STRUCTURE?

There are **NO** forms to pick or fill. All information will be sent through the registration portal on our website. Kindly log into [www.intaspordia.com/register](http://www.intaspordia.com/register) and create an account.

If you need assistance in logins, you can:

**CALL US ON: 0721127858**

EMAIL US: [info@intaspordia.com](mailto:info@intaspordia.com)

or visit our Mang'u Campus, 2.5kms off Exit 16 on Thika Superhighway.
